

Accreditations

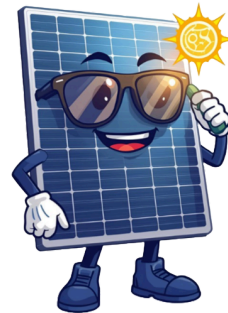

With our extensive experience, our accreditations reflect our commitment to excellence and safety:

- **MCS:** Certification that ensures our work meets the highest standards.
- **NAPIT:** Ensuring we meet all technical and safety regulations.
- **NICEIC:** An approved contractor scheme that verifies our work complies with the latest wiring regulations.
- **RECC:** Adhering to the consumer protection standards for renewable energy installations.
- **IWA:** Provides a two-year workmanship insurance-backed guarantee on our workmanship for Solar PV and Battery Storage projects.

Electrical Services
Solar PV & Solar Battery Storage

Your Trusted Partner in Electrical Solutions

Services We Provide:

- Solar PV
- Battery Storage
- EV Chargers
- Domestic Electrical
- Commercial Electrical

Slash Your Energy Bills

Harnessing the sun's power is one of the smartest ways to reduce your energy costs. You can install a Solar PV system, a battery storage system, or both to get started.

Benefits of Solar PV:

- **Generate your own clean electricity** during the day and use it to power your home instead of buying from the grid.
- **Reduce your reliance on the grid** and lower your electricity bills.
- **Increase your energy independence** with a sustainable power source.

Benefits of Battery Storage:

- **Can be installed on its own**, even if you do not have a solar panel system.
- **Store excess solar energy** from your panels to use at night or on cloudy days.
- **Take advantage of off-peak tariffs** by charging your battery when rates are lowest and using that stored power when rates are highest.
- **Provide backup power during outages** to keep essential appliances running.

Our Services

We specialize in **renewable energy** solutions and general **electrical work**, providing expertise and high standards to every project.

- **Solar PV Solutions:** Harness solar power to reduce bills and your carbon footprint.
- **Battery Storage:** Store excess power for energy independence and optimal usage.
- **EV Charger Installations:** Efficiently power your electric vehicle at home or your business.
- **General Electrical Work:** All aspects of domestic and commercial electrical work handled by certified professionals.

Did You Know?

- **Solar energy is the fastest-growing** source of renewable energy! Join the **millions** of homeowners who are taking control of their energy consumption and embracing a sustainable future.
- **You can increase your property's value.** Homes with solar panel systems are often more attractive to buyers and can sell for a higher price.
- **You can earn money from your solar panels.** The Smart Export Guarantee (SEG) allows you to get paid for any excess electricity you don't use and export back to the grid.
- **You can future-proof your home.** Installing renewable energy systems now protects you from rising energy costs and makes your property more resilient to power grid fluctuations.
- **You could power your home even on cloudy days.** Battery storage systems allow you to store energy, so you can use it anytime you want, regardless of the weather.
